

# May News

Miss Genny and Miss Alexis' Pre-K4 Class

The staff and students are looking forward to honoring all preschool moms on Friday, May 11<sup>th</sup> at our **May Crowning and Mother's Day Tea**. Moms, please take notice of our Art Show! It is a compilation of our art projects from the entire year. Each child will have one piece of artwork displayed on our wall. Any extras we have been saving will be sent home soon.

The children are excited that we are nearing the end of the alphabet! We'll focus on letters Y and Z and then have lots of fun reviewing all the great things we've done and learned this year.

## This Month

- Y week – yellow, yarn, yaks, and yo-yos
- Z week – zebras, zippers, zoo animals
- May Crowning and Mother's Day
- Review – letters, numbers, colors, shapes, sight words, and Bible stories
- Dinosaurs
- My Favorite Things

## God is like the Wind

When discussing the wind during "W" week we talked about how we cannot see the wind but we see what it does. We sometimes see it moving the clouds, the leaves, and even our own hair and clothes. Similarly, we don't see God but we see what He has done. He created our wonderful world and all of the people in our lives. Thank you for allowing us to be part of your children's faith journey this year. We thank God for each of them!

## New Life in Our Classroom

We are waiting for the butterflies to emerge from the four chrysalides and for all the lima bean plants to sprout. The children enjoy checking on the progress each day.

## Last Month's Review

- V is for Vine – We discussed how Jesus is the vine and we are the branches. We stay connected to Him through prayer so that we can grow the "Fruits of the Spirit" that God planted in each of us.
- Wacky Wednesday – The children were surprised to find our classroom completely rearranged when they arrived on Wacky Wednesday. They enjoyed listening to the Dr. Seuss story and doing some things out of order that day.
- X is for X-ray – The children get to play with X-ray films all year long when we set the Doctor's Office out, but they learned even more about the different bones we see in X-rays.
